Index to Volume 10

Authors

A

Ahmed, M. 143
Andersson, Bengt Orvar 221
Angelsen, Sture 201

B

Boey, David 58
Britton, Laurence 27

C

Chatrathi, Kris 159
Conley, Michael 201
Crowl, Daniel A. 136

D

DeGood, R. 159
Delboy, William J. 207
DesJardin, Michael 69
Debnansky, Richard F. 207
Dunbobbin, B. R. 45
Duswalt, Allen A. 55

F

Ferney, Michael J. 133
Fisher, Harold G. 1
Frank, Walter L. 93
Freeman, Raymond, A. 155
Fromm, Dieter 223

G

Grossmann, Georg 223
Gustafson, Douglas 69

H

Hansel, J. G. 45
Helling, Richard 69
Hempseed, J. W. 184
Hill, Ronald 129

K

Kaiser, Mary A. 100
Keffer, William J. 194
Kletz, Trevor 17, 81
Kohlbrand, Henry T. 52
Kottowski, Heinz M. 107

L

Ladd, Mary Jo 69
Lapp, K. 85
Lapp, Steven A. 207
Lavin, M. 143

M

Mackenzie, John 164

N

Nicolson, Adrian 171
Norman, Edward C. 22

O

Ormsby, R. W. 184

P

Paula, Henrique M. 115
Piotrowski, Thomas 102

R

Roberts, Michael W. 115
Roussakis, N. 85
Ryer-Powder, Jill 228

S

Schreiber, Sanford 65
Singh, Jasbir 58
Skouloudis, Andreas N. 107
Squire, R. H. 212
Steele, Kent 69
Swihart, Thomas M. 22

V

Vanderhoof, Danae 69

W

Werley, B. L. 45
West, A. S. 13
Wilhelm, S. Mark 189
Williams, David 201

Z

Zodeh, Oli M. 93

Titles

A

Accident at a Lithuanian Fertilizer Plant, An 221
Ammonia Storage Tank Study, An 212
Ammonia Vessel Integrity Program—A Modern Approach 201

C

Case History of a Deflageration Involving an Organic Solvent/Oxygen System Below Its Flash Point 52
Comprehensive Test Method for Inline Flame Arrestors, A 85
Considerations for the Safe Design of Processes Using Hydrogen Peroxide and Organics 164

D

Design of Quench System for Runaway Reactions Using Bench-Scale Equipment 58
Documentation of Hazard and Operability Studies 155
Dow Chemical Western Division Research Pre-Operational Review for New Projects 69

E

Effect of Elemental Mercury on Engineering Materials Used in Ammonia Plants, The 189
Effect of O_2 Concentration on Methacrylic Acid Stability, The .. 171
Emergency System Design Practice, An Overview of 1
Experimental Errors in Predictions of Thermal Hazards 55
Explosion Isolation Systems Used in Conjunction With Explosion Vents 159
Explosion Within a Helium Purifier 184
Exothermic Reactions of DCPD and Protection Against Them ... 143

F

Foam System Design for Ammonia Storage Tank Areas 22
Forestalling a Serious Incident: A Detective Story 100

G

Guidelines for Technical Management of Chemical Process Safety 65

H

HAZOP-Proof Ammonia Plant: A New Way to a Safe and Reliable Design 223
Health Effects of Ammonia .. 228
Human Problems With Computer Control: An Update 17
Hydrodynamic Aspects of Venting for Vessels Containing Viscous Fuels 107
Inherently Safer Plants: An Update 81

M

Management of Hazardous Materials at a Local Community Level 194

P

Process Safety Impact of Distributed Control Systems, The 93
Process Simulation for Safety 133

R

Reliability Performance of Fault-Tolerant Digital Control Systems 115
Role of Instrumentation and Process Controls in Minimizing Accidental Releases 129

S

Sensitivity of Process Risk to Human Error in an Ammonia Plant 207
Specification of Flame Arresting Devices for Manifolded Low Pressure Storage Tanks 102
Spontaneous Fires in Insulation 27
Structured Packings for Use in Oxygen Service: Flammability Considerations 45

T

Thermodynamic Availability to Determine the Energy of Explosion, Using 136

W

Worker Hazard Communications: The Regulatory Framework .. 13

Subjects

A

Ammonia
health effects of 228
storage tank areas 22
storage tank study 212
vessel integrity program 201
Ammonia plants
engineering materials used in 189
HAZOP-proof 223
sensitivity of process risk to human error 207
Accident at a Lithuanian fertilizer plant 221
Accidental releases, minimizing 129

B

Bench scale equipment, design of quench system using 58

C

Chemical process safety, guidelines for management of 65
Comprehensive test method for in-line flame arrestors 85
Computer control, human problems with 17
Case history of a deflagration 52

D

Deflagration involving organic solvent/oxygen system 52
Design of quench system for runaway reactions 58
Digital control systems, reliability performance of 115
Documentation of hazard and operability studies 155
Dow Chemical research pre-operational review for new projects 69

E

Elemental Mercury on engineering materials 189
Effect of O_2 concentration of methacrylic acid 171
Emergency system design practice 1
Energy of explosion, thermodynamic availability to determine 136
Experimental errors in prediction of thermal hazards 55
Explosion
isolation systems 159
vents 159
within a helium purifier 184
Exothermic reactions of DCPD 143

F

Fault-tolerant digital control systems 115
Flame arrestors, in-line 85
Flame arresting devices, specification of 102
Flammability considerations 45
Fires, spontaneous in insulation 27
Foam system design for ammonia storage tank areas 22
Forestalling a serious incident 100

G

Guidelines for technical management of chemical process safety 65

H

HAZOP-proof ammonia plant 223
Hazard communications, worker 13
Hazardous materials, management of 194
Health effects of ammonia 228
Human problems with computer control 17
Hydrodynamic aspects of venting 107

I

Inherently safer plants 81
Instrumentation, role of in minimizing accidental releases 129
Insulation, spontaneous fires in 27

M

Management
of chemical process safety 65
of hazardous materials 194
Manifolded low pressure storage tanks 102
Minimizing accidental releases 129

O

Oxygen service flammability considerations 45

P

Packings for use in oxygen service 45
Process controls, role of in minimizing accidental releases ... 129
Process risk to human error .. 207
Process safety
guidelines for technical management of 65
impact of distributed control systems 93
Process simulation for safety 133

R

Reliability performance of digital control systems 115
Role of instrumentation and process controls 129
Reactions of DCPD and protection against them 143

S

Sensitivity of process risk to human error 207
Specification of flame arresting devices 102
Spontaneous fires in insulation 27
Structured packings for use in oxygen service 45

T

Thermodynamic availability, using 136

W

Worker hazard communications 13
